

# Cowboy Couture

Welcome to our first western fashion collection. The collection is titled Cowboy Couture and is comprised of three different design sets. The designs in the Cowboy Couture collection were created for all different types of garments. Each of the design sets come with designs for pants that stack on top of each other to go up the pant leg. There are also designs for shirt fronts and shirt backs. Not only are the designs created for garments, we also included all of the necessary sizes and mirrored images. The first design set is pure western with beautiful swirls and horse silhouettes. The designs in the second set are flowers with horseshoes and the third set is vintage western with cowboys, swirls and badges. If you are a western fan you will love these designs.

We created three different garment sets for Cowboy Couture. We created a shirt and pair of pants for each of the design sets. The following pages will show you how to use the designs on your garments. We also created a 50+ page Fashion Workbook that will show you dozens of techniques on how to customize any type of garment. The Fashion Workbook is located in the tutorials folder on the CD-Rom.

## Please Read!!!

**This tutorial includes the project photos and color steps. For the complete “Fashion Workbook” you need to open a separate file. The file is located in the tutorials folder. The Fashion Workbook is 50 pages full of information, tips and techniques.**

# Shirt - Design Set 1

The first sample we created for Cowboy Couture is a classic white western shirt. We embroidered the horse silhouette designs on the front of the shirt and the back of the shirt. We purchased the shirt in a western wear store and used the smaller size of the designs for this project. We also embellished the designs with hot fix nail heads. These designs come with versions for the nailheads or crystals and a plain version.

The designs used in this arrangement come in both small and large sizes so that you can choose the right size for your garment.

These designs were created for shirts. Notice how they conform to the shape of the yoke fronts and backs.

**Learn additional techniques in the Fashion Workbook.**

# Pants- Design Set 1

We created a matching pair of pants to go with the white shirt. We reversed the colors on the horse silhouettes so they would be visible. Either garment would look great worn on its own as well as together.

Whenever you embroider large designs on pants you need to open and close the seams. This is an easy technique that is taught in our fashion workbook.

You don't need to use all 3 designs to create a beautiful pair of jeans you can use 1 or 2 designs as well. To create these arrangements we use templates. Learn how to use templates in the Fashion Workbook.

We added a small design on the opposite hip for added detail.

**Learn additional techniques in the Fashion Workbook.**

## Shirt - Design Set 2

When purchasing blanks for embroidery don't just look for plain garments. Printed fabrics like plaid work just as well. For this sample we are using a green plaid western style shirt. We added the horseshoe designs on both the left and right chest as well as the companion design below the pocket.

All of the chest designs in Cowboy Couture come in different sizes and mirrored versions so you will have less work to do.

We created this back design with four different designs. Use templates to come up with an arrangement that works on your garment.

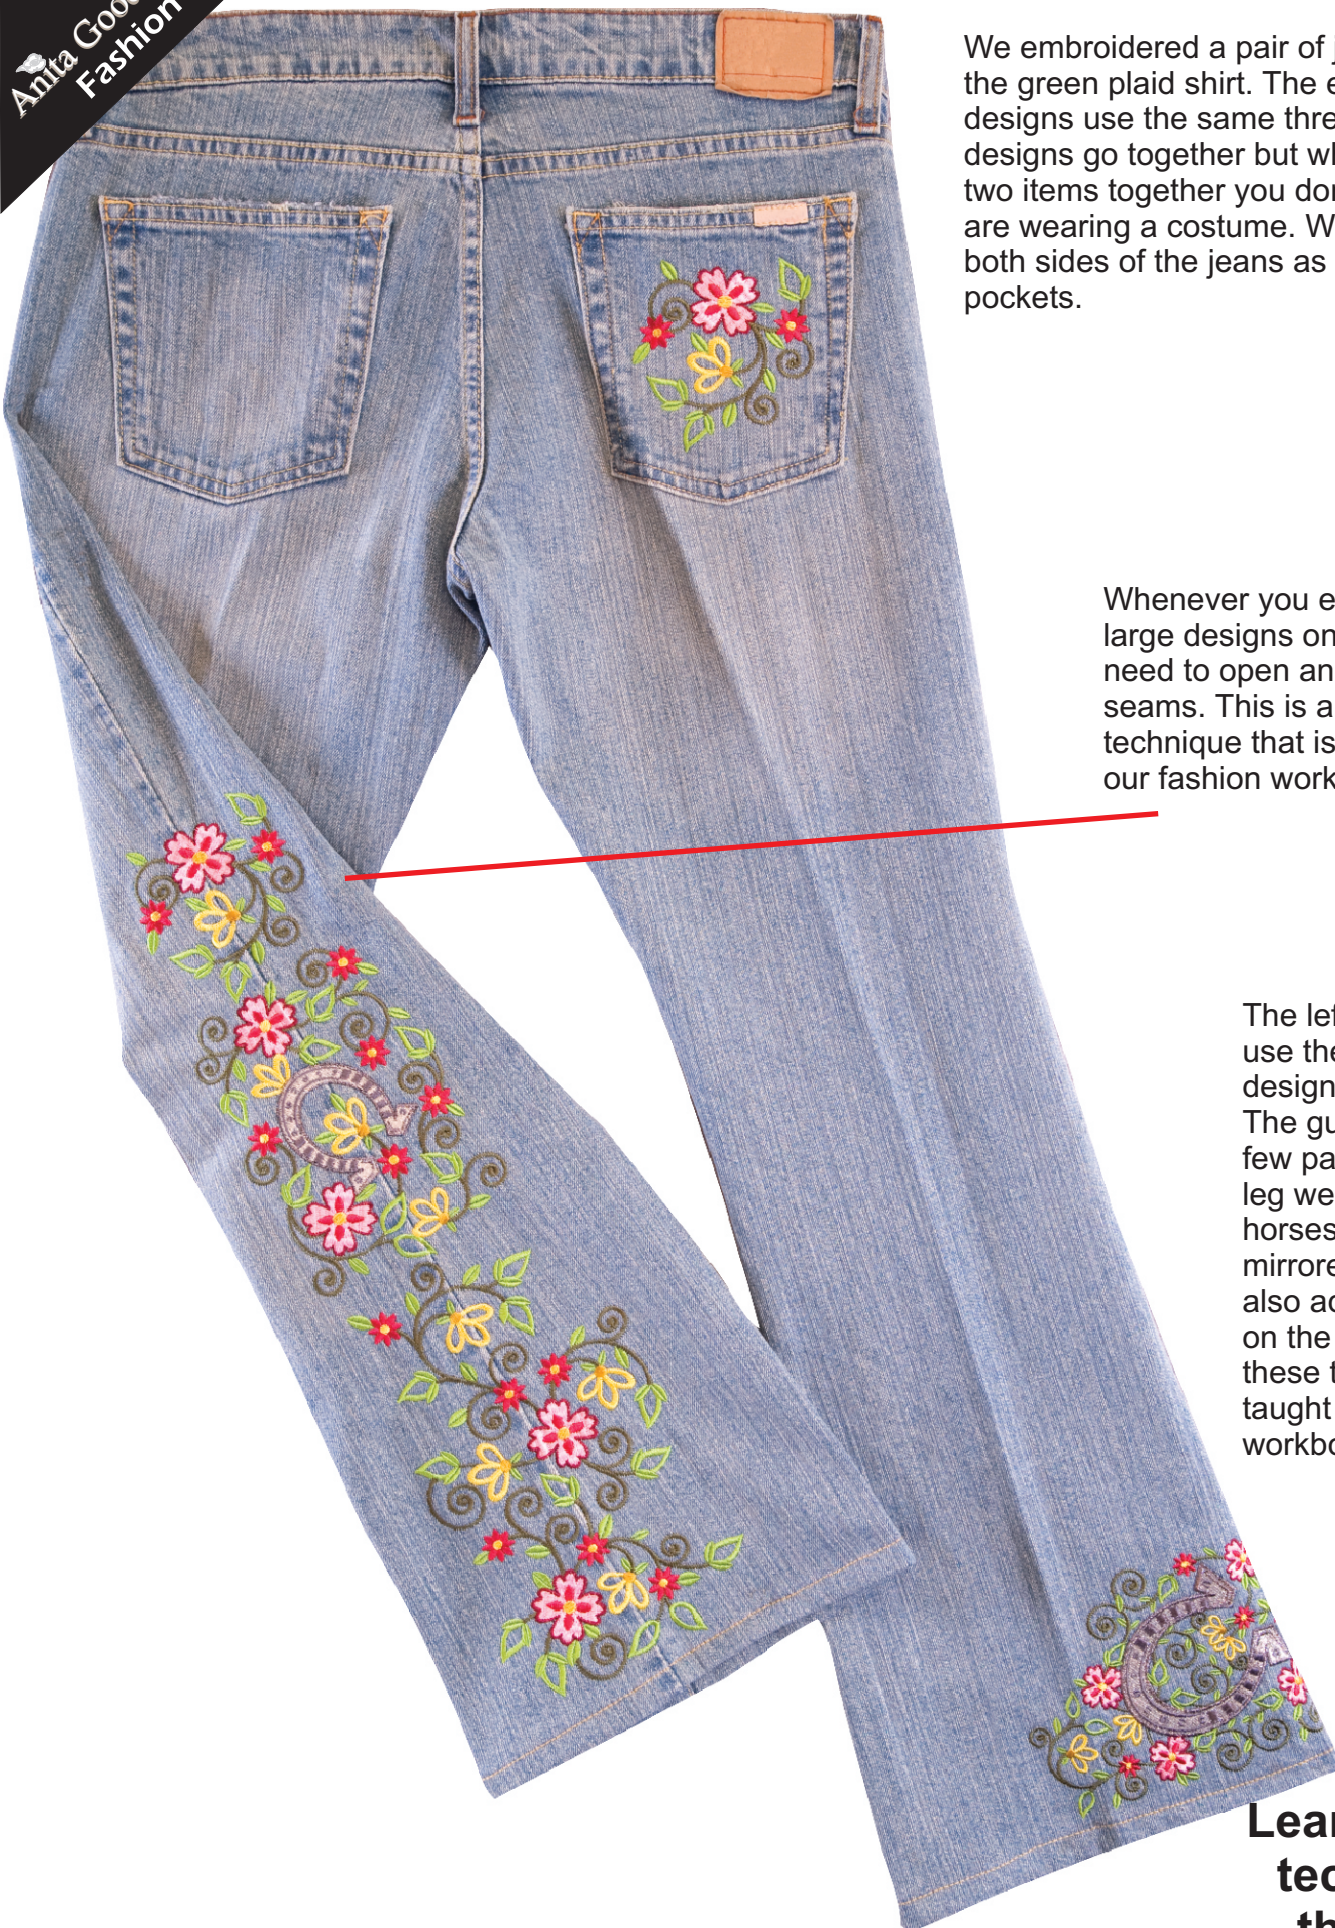

## Pants- Design Set 2

We embroidered a pair of jeans to go with the green plaid shirt. The embroidery designs use the same thread colors so the designs go together but when you wear the two items together you don't look like you are wearing a costume. We embroidered both sides of the jeans as well as the pockets.

Whenever you embroider large designs on pants you need to open and close the seams. This is an easy technique that is taught in our fashion workbook.

The left side of the jeans use the three designs we designed for pant legs. The guide is on the next few pages. For the right leg we used one of the horseshoe designs mirrored at the seam. We also added a small flower on the back pocket. All of these techniques are taught in the fashion workbook.

**Learn additional  
techniques in  
the Fashion  
Workbook.**

## Shirt - Design Set 3

Every shirt that you will buy will have a different type of collar or different neckline. These designs are great because they are very versatile. Simply use the templates to arrange the designs around the neckline of your garment. The shirt already had the color blocking done on it when we purchased it so we selected the designs that fit the best.

We created this back design with four different designs. Use templates to come up with an arrangement that works on your garment.

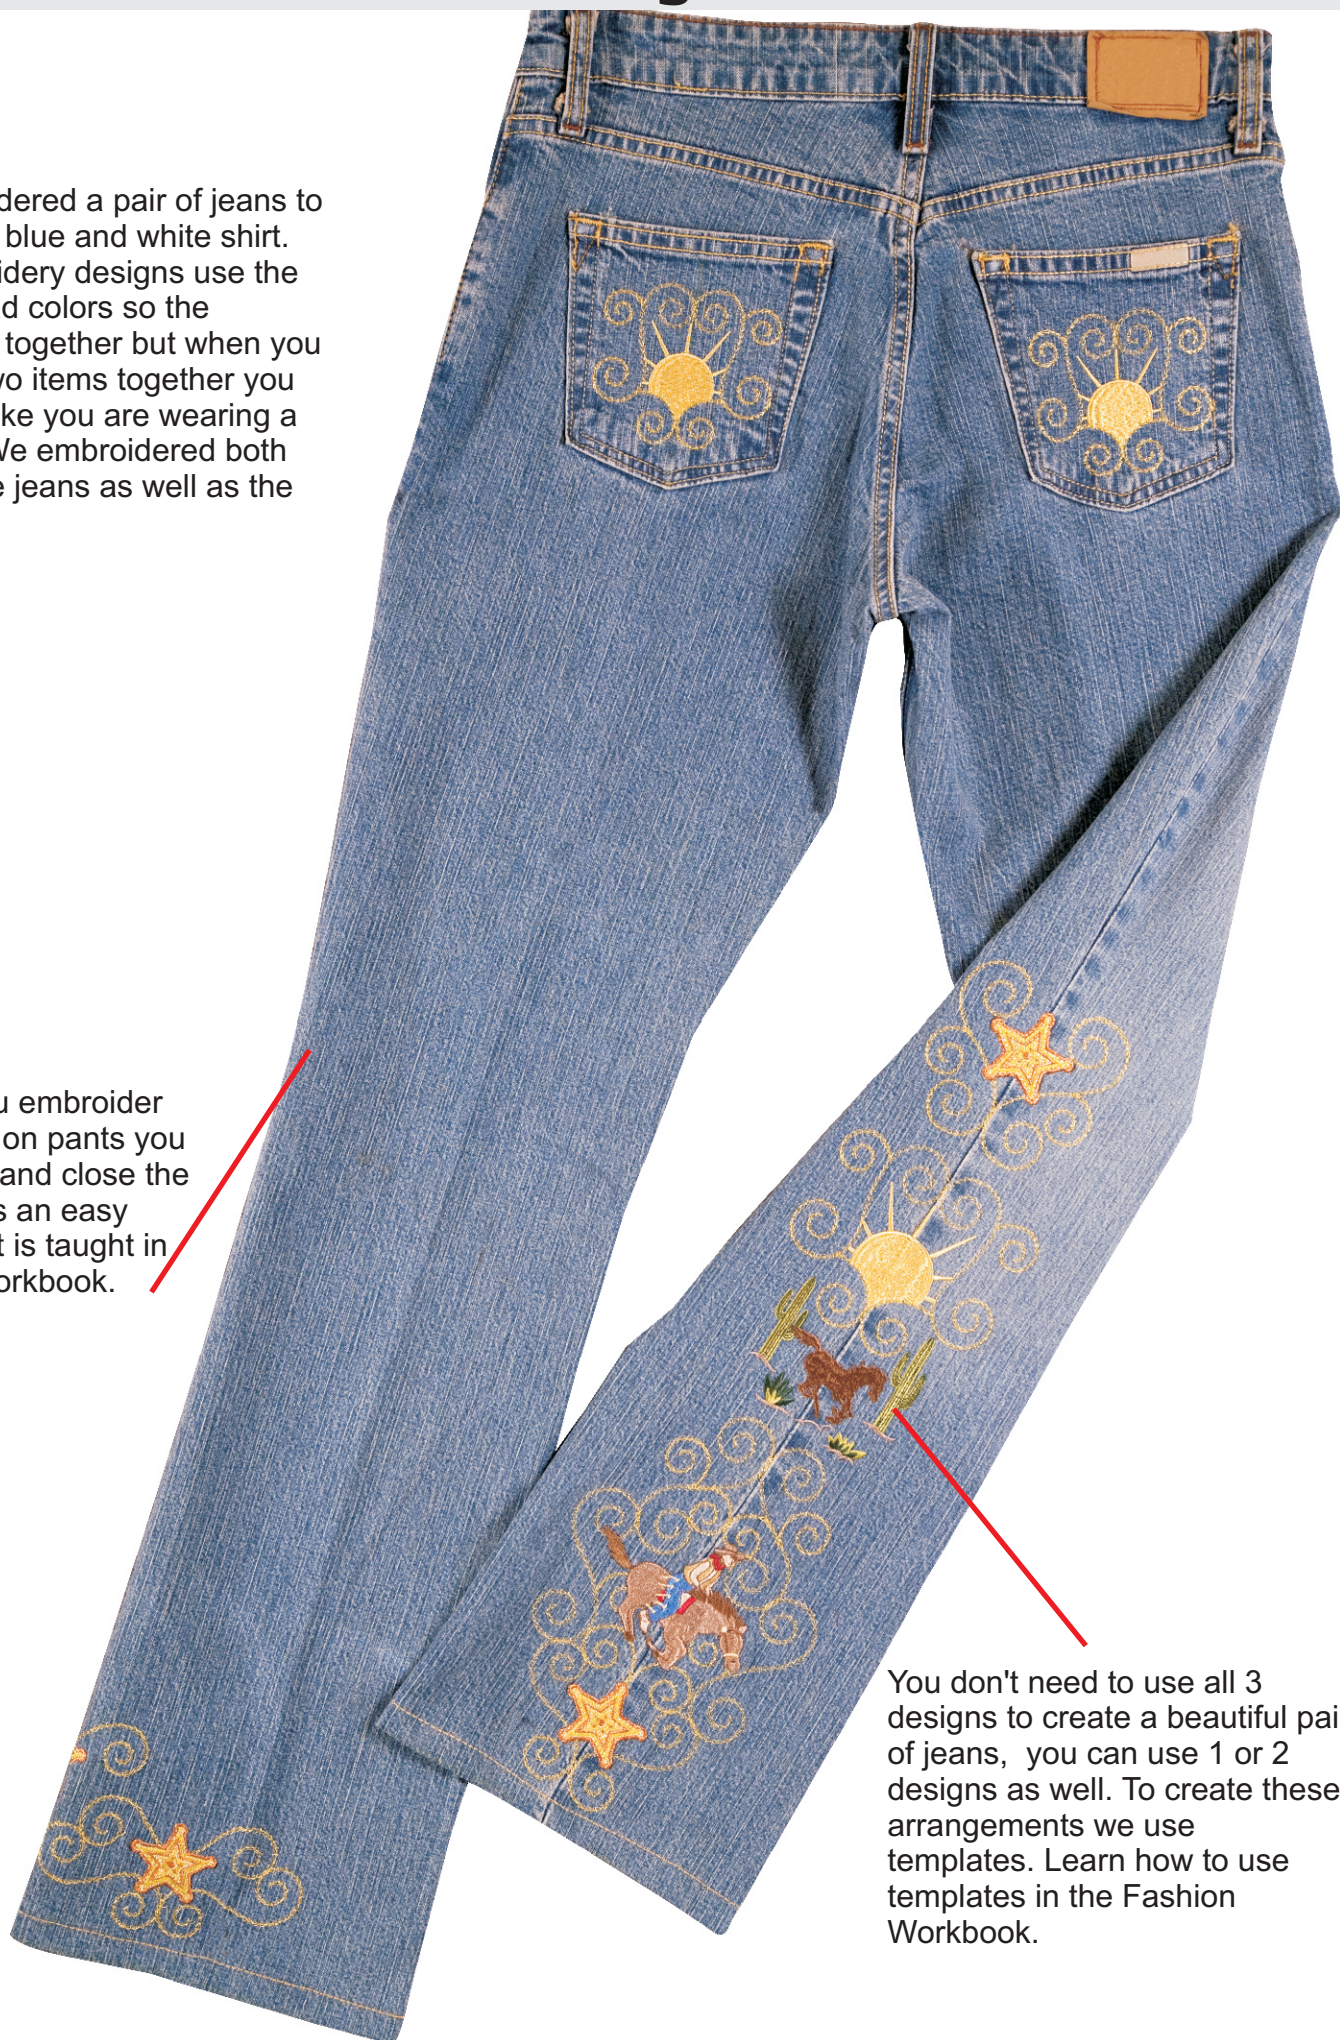

# Pants - Design Set 3

We embroidered a pair of jeans to go with the blue and white shirt. The embroidery designs use the same thread colors so the designs go together but when you wear the two items together you don't look like you are wearing a costume. We embroidered both sides of the jeans as well as the pockets.

Whenever you embroider large designs on pants you need to open and close the seams. This is an easy technique that is taught in our fashion workbook.

You don't need to use all 3 designs to create a beautiful pair of jeans, you can use 1 or 2 designs as well. To create these arrangements we use templates. Learn how to use templates in the Fashion Workbook.
